SUMMARY

Computer Science and Engineering undergraduate with a strong foundation in software development, web technologies, and AI-based applications. Proficient in Python, Java, JavaScript, HTML, CSS, and Salesforce CRM, with hands-on experience developing machine learning and full-stack projects. Passionate about solving real-world problems through clean, efficient code and continuously expanding technical knowledge. A quick learner, adaptable team player, and aspiring software engineer seeking an opportunity to contribute to innovative projects while growing in a dynamic IT environment.

SKILLS

Programming & Web Technologies: Python, Java, JavaScript, SQL, HTML5, CSS3
Frameworks & Tools: GitHub, VS Code, WordPress, MS Excel
Platforms & Concepts: Salesforce CRM, Windows, Linux (Ubuntu), Networking, Machine Learning.

PROJECTS

Finding Missing Person Using AI

- Developed an AI-powered facial recognition system using Python, OpenCV, and Deep Learning to identify missing persons.
- Implemented image preprocessing and face recognition techniques, enhancing system performance under varying lighting and environmental conditions.
- Optimized the face-matching techniques to enhance identification accuracy and processing efficiency.

Breakout Game

- Executed a classic arcade Breakout game using Python and Pygame, featuring brick destruction and collision detection.
- Implemented a dynamic brick grid with 60 destructible bricks arranged across 10 columns and 6 rows.
- Designed ball collision mechanics, paddle controls, and automated Win/Game Over states with smooth gameplay at 60 FPS.

Pong Game

- Managed a two-player Pong game using Python's Turtle graphics module to recreate the classic arcade gaming experience.
- Implemented real-time score tracking, keyboard-controlled paddle movement, and dynamic ball speed adjustment after collisions.
- Designed game logic with collision detection and a winning condition to declare the winner at 10 points.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

Oxford Engineering College, Trichy · Affiliated with Anna University 2022 – 2026

CGPA: 8.0 / 10.00 | Best Outgoing Student Nominee

- Honored with multiple recognitions for academic excellence and leadership, including a nomination for the Best Outgoing Student Award.
- Built a strong foundation in Computer Science and Engineering by consistently applying theoretical concepts to practical software development projects.

CERTIFICATIONS

- Web Development – Don Bosco Tech in collaboration with Accenture
- AI and Green Skills – Edunet Foundation
- RPA Foundation Course (Diploma) – UiPath Academy
- Experience-Based Project Learning – IBM SkillsBuild

ACHIEVEMENTS

First Prize – Debugging Competition | UI/UX Design Runner - Symposium | Best Outgoing Student | Successfully organized the Technical Quiz event | NSS Team Member (2 yrs)
